MotorisedBlinds

The smart choice

Motorised Roman Blinds
Installation & Pairing Instructions

You should have:
- Roman blind (fully assembled)
- Fixing brackets (quantity to suit the length of a blind)

YOU WILL NEED

- Screwdriver
- Pencil
- Drill
- Tape measure
- Step ladder

**The installation of this product should be conducted by someone competent in DIY.**

STEP 1 - FITTING THE BRACKETS

Choose how to mount the brackets. The brackets are a universal type that can be used to top fix or face fix.

Top Fix
Top fix to the top of the recess.

Face Mount
Face mount onto a wall/ window frame.

Please note: if using a battery pack sufficient clearance is required for the battery pack.

Deciding Where To Mount The Brackets
Ensure that brackets are positioned a suitable distance away from any window/ door handles or any other obstructions to allow the blind to operate smoothly.

110mm | 110mm

A bracket should sit either side of the rail, 110mm away from the end. Remaining brackets should be equally distributed along the width.

Hold each bracket into place and mark the hole positions using a pencil. Fit each bracket using 2 screws provided. If a pilot hole is required, use a 2.5mm drill bit. Ensure the brackets are level to ensure the smooth operation of the blind.

For fixing to alternative surfaces i.e. plaster/ concrete, alternative suitable fixings should be used.

STEP 2 - FITTING THE BLIND

We supply the headrail with a blind already attached to it.

When the brackets have been fitted to the window area, holding the blind up, rest the front ridge of the rail onto the front lip of the bracket.

Lift the back of the rail to meet the bracket, push centre of the spring so that it clicks into place securely and release.
LI-ION RECHARGABLE BATTERY PACK

1. Attach the wall brackets
   to desired area in window
   recess, leaving enough
   room for the blind.

   *The battery pack
   can be secured
   outside the headrail
   in either vertical or
   horizontal position.*

   *We recommend
   the battery pack
   is secured behind
   the headrail so it is
   hidden from view.*

2. Connect the battery
   pack to the motor.

BATTERY CABLE

ANTENNA

MOTOR CABLE

LI-ION RECHARGABLE SOLAR PACK

1. Fix the mounting brackets, to the selected area you wish to place the battery.

   The battery can be secured outside the headrail in either vertical or horizontal position.

   We recommend the battery is secured behind the headrail so it is hidden from view.

2. Clip the battery into the mounting brackets.

3. Clean the solar panel corners and the selected area on the window where the solar panel is to be fitted with the alcohol prep pad and allow to dry for 2 minutes.
LI-ION RECHARGABLE SOLAR PACK

4. There are two options to fit the solar panel.

Adhesive Tape: Apply the adhesive tape to the four corners of the solar panel facing upwards. Position the solar panel on the window facing outside, press the entire panel with firm even pressure onto the glass for 15 seconds. Allow 24 hours for the adhesive to bond to the glass, do not disturb during this period.
Or

Attach the wall brackets to desired area in window recess, leaving enough room for the blind.

5. Connect the single end of the wire harness to the motor, connect the dual end to the solar panel and battery.

ADJUSTING THE UPPER END LIMIT (UPPER BLIND POSITION)

SINGLE & MULTI-CHANNEL REMOTE

1. Press the **UP** button, to move the blind to the upper end limit.

2. Press and hold the **UP** and **DOWN** buttons simultaneously until the blind jogs.

3. Press and hold either the **UP** or **DOWN** button to adjust slats to the new position.

4. To confirm the new limit press and hold the **MY** (stop) button until the blind jogs.

ADJUSTING THE LOWER END LIMIT (LOWER BLIND POSITION)

SINGLE & MULTI-CHANNEL REMOTE

1. Press the **DOWN** button to move the blind to the lower end limit.

2. Press and hold the **UP** and **DOWN** buttons simultaneously until the blind jogs.

3. Press and hold the **UP** or **DOWN** button to move the blind to the new desired position.

4. To confirm the new limit press and hold the **MY** (stop) button until the blind jogs.

SETTING INTERMEDIATE LIMIT (MY FAVOURITE POSITION)

SINGLE & MULTI-CHANNEL REMOTE

1. Press the **UP or DOWN** button until the blind slats reach a desired favourite position, then press the **MY** (stop) button to stop. If necessary, adjust the desired slat position by pressing and holding either the **UP or DOWN** button.

2. Press and hold the **MY** (stop) button until the blind jogs. Favourite my slat position is now added to the memory.

3. Activate the blind favourite position by pressing the **MY** (stop) button from any slat position. Slats will move to the closed down position prior to stopping at the programmed my position.

ADJUSTING THE FAVOURITE POSITION
SINGLE & MULTI-CHANNEL REMOTE

1. Press the **UP** or **DOWN** button until the blinds reach the desired favourite position.

2. Press the **MY** button until the blind jogs. Favourite position has now been set.

RESTORE TO FACTORY SETTINGS

1. To delete all previous settings: Using a paperclip, press and hold the
    PROGRAM button, located on the top of the motor casing, until the
    blind jogs 3 times (approx. 12 seconds).

    *All remotes and limits will be erased from the motor memory. Motor is
    now reset to factory mode.*

PROGRAMMING BUTTON

ADVICE & CARE

CARING FOR YOUR BLIND

- Don't allow moisture to settle on the blinds.

- Wipe with a clean damp cloth.

- Vacuum your roman blind using the vacuum upholstery attachment.

- Don't use any type of detergent to clean your blind.

- Don't oil or lubricate any part of the blind to prevent damage.

- Dry cleaning recommended.

WARNING

Young children can be strangled by loops in pull cords, chains, tapes and inner cords that operate the product.

To avoid strangulation and entanglement, keep cords out of the reach of young children.

Cords may become wrapped around a child's neck.

- Move beds, cots and furniture away from window covering cords.

- Do not tie cords together.

- Make sure cords do not twist and create a loop.
